INTERVALS FESTIVAL 23.04—26.04

INTERVALS 2026 is dedicated to signs and symbols.

A sign is a functional code of communication that sets the conditions for interaction. Its effect is immediate and reaches large numbers of people.

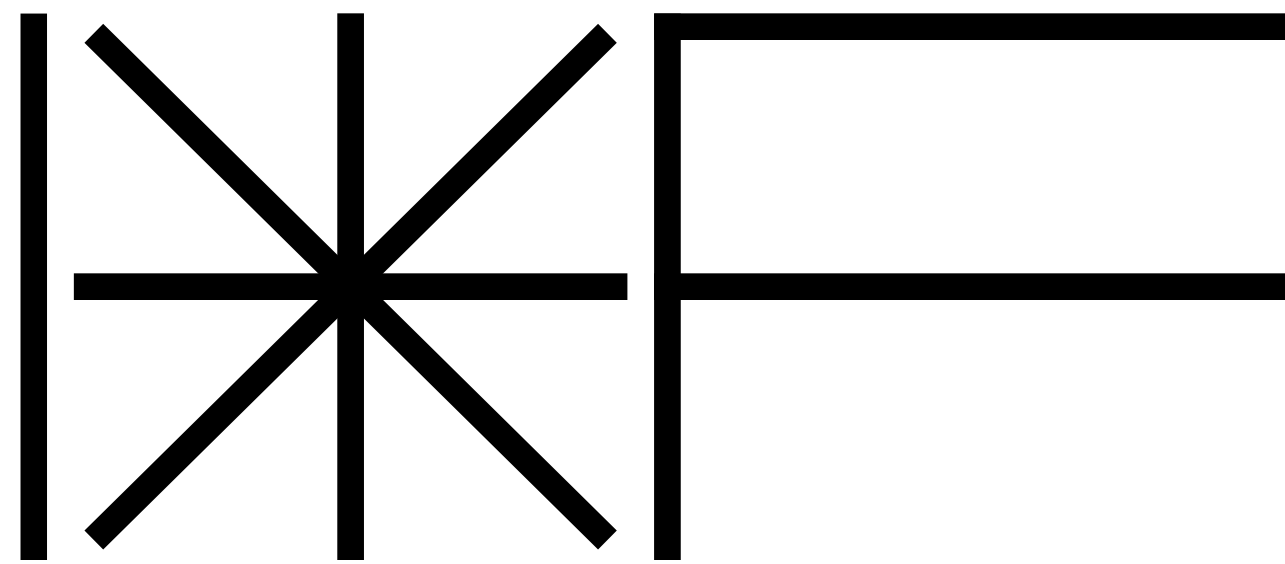

A symbol is an image, often deeply personal, that carries feelings, memory, and attitude. It is not limited by form or time.

What can happen at the intersection of a sign and a symbol?

This connection creates new situations in which literal meanings transform into systems of images and shape new ways of communication through art.

The festival considers the city as an infrastructure of meanings: a network of signs and symbols that controls perception and forms a collective memory.

Artworks intervene in this network, creating new routes of perception.
